

September 13, 2006

TO: Transportation Authority of Marin Commissioners

FROM: Dianne Steinhauser, Executive Director

RE: Infrastructure Bond Priorities, Agenda Item 5

Dear Commissioners:

#### **Executive Summary**

The Infrastructure Bonds on the ballot this coming November 7<sup>th</sup> are a significant investment in addressing the dire state of public works in California. Over the next ten years, California faces a \$115 Billion shortfall in funding to meet its transportation needs. With a population of \$34 Million and growing, California needs to pull out of its position of dead last amongst states in transportation investment from state funds.

The \$19.925 Billion dedicated to transportation through the Governor's approval of SB 1266, on the ballot as Prop 1B, will enable substantial improvements to transportation in the Bay Area. Its companion proposition, Prop 1A, will close the loophole allowing Prop 42 revenues to be annually deferred to other needs. With funding proposed in a wide variety of categories, Marin has much to gain in supporting the Transportation Bond propositions.

TAM staff seeks a support position from the TAM Board for the transportation ballot measures Proposition 1A, Transportation Investment Fund, and Proposition 1B, Highway Safety, Traffic Reduction, Air Quality, Port Security Bond Act of 2006, going before voters in November. TAM staff will be working to distribute information about the ballot measures over the coming months. The support position centers around a number of categories of funding that Marin will receive funds from, or compete well in. These categories, and specifics regarding Marin's role in each, are explained in detail below and on the attached documents.

Recommendation: that the TAM Board adopt a support position for Proposition 1A and Proposition 1B on the ballot in November 2006.

#### Elements of the Transportation Bond Act, Proposition 1B

#### Corridor Mobility Investment Account- \$4.5 Billion

The CMIA is dedicated to improvements on the state highway system or major access routes to the state highway system. Candidates can be recommended from Caltrans or from the Regional Transportation Planning Agency (RTPA) or Council of Governments (COG). In the Bay Area, MTC serves as the RTPA and will be coordinating closely with Caltrans so that each agency submits the same list of candidates.

A Statewide CMIA Working Group has been meeting since June to develop draft guidance regarding the CMIA Program. Several features in that guidance are likely to be included in the final draft given to the CTC just prior to their October 10-11 meeting, to be held in Sonoma County. Current discussion:

- The CTC is required as part of the guidance to adopt "regional programming targets." As the CMIA Program is prescribed statutorily to follow the North-South split, the 40% share in Northern California is likely to be distributed amongst 5 primary areas: The Bay Area, the Central Coast, Sacramento, the San Joaquin Valley, and the rural north counties. Discussion has ensued over daily vehicle hours of delay being the primary factor in assigning targets. The Bay Area accounts for over 85% of the congestion in Northern California. The MTC region is proposing a target reflecting that fact.
- With a statutory deadline that projects "can commence construction or implementation no later than December 31<sup>st</sup>, 2012" the guidance will likely create a deadline of December 31<sup>st</sup> 2011, allowing substitution for projects missing the deadline. The emphasis on deliverability will serve to screen out projects not ready for the program with periodic adjustments to the program based on delivery failures.
- Performance measures will serve as screening mechanisms in selecting projects. They
  will guide the decision for inclusion of projects in the program. Performance measures
  being actively discussed are
  - o Daily Vehicle Hours of Delay
  - Peak Travel Time
  - Fatal Injury Accidents
  - Collision rates
  - Reduction in miles of substandard facilities
- Some sort of documentation will be required similar to a Project Study Report tat exhibits in detail the project cost, scope, and schedule in order for a project to be considered for adoption into the CMIA Program. It is unlikely that the CTC will have \$4.5 Billion in well documented projects by the March 1<sup>st</sup> deadline for initial program adoption. A second round of program adoption after that date may occur.

The CTC staff has adopted a schedule of meeting the statutory requirements. That schedule, coupled with MTC likely activity is highlighted below:

Release of draft CMIA guidelines	October 10-11 CTC meeting
Ballot Measures successfully pass Nov 7 <sup>th</sup> election	Nov 7th
Adopt Guidelines	November 8-9 CTC meeting
MTC & CT & sponsors finalize draft list of projects	Nov/ early Dec
Bay Area Partnership meeting to consider CMIA list	early December
Special MTC Commission meeting	early January 2007

Marin's most likely candidates in the CMIA Program are as follows. Staff will be bringing a list of project specifics back to the TAM Board for further discussion in November or December:

- The Greenbrae/580/101 Interchange complex
- The Marin Sonoma Narrows
- The 101/131 Interchange, or the "Tiburon Wye"

#### California Ports Infrastructure, Security, & Air Quality Improvement Account - \$3.1 Billion

While substantial in size, this element will primarily be dedicated to improvements around the Southern California ports of Los Angeles and Long Beach, which represent over 70% of California's port activity. Two billion dollars of these funds are contained within the Trade Corridor Improvement Fund (TCIF), \$1 billion are dedicated to the State Air Resources Board for emission reductions, and \$100 million are dedicated to the Office of Emergency Services for port, harbor, and ferry terminal security improvements. The Business Transportation and Housing Agency is on schedule to submit a "goods movement plan" to the CTC, by January 1, 2007, which is to be consulted prior to the CTC allocating any funds. Note that a substantial match, envisioned as 50% or greater, is required for projects to be considered in this category.

In the Bay Area, the focus for receiving any of the \$2 billion in the TCIF account is the Port of Oakland. Rail improvements for accessing the port as well as trucking improvement around the port are currently under consideration. The counties of Alameda, Contra Costa, and San Joaquin are coordinating with the trucking industry as to what trucking improvements may be feasible along Hwy 580 over the Altamont Pass and along the Hwy 205 Corridor.

While Marin County has substantial truck traffic, both within Marin and moving through Marin into and out of Sonoma County (approaching 10% ADT), MTC is focusing on immediate needs in and around the Port of Oakland, as well as the 580 Corridor. The 50% match requirement is daunting for most CMA's to participate. The Port of Oakland's needs are the Bay Area's best chance to compete with the Southern California ports and their Alameda Corridor.

#### State Local Partnership Program (SLPP)

The CTC staff have plans for a working group to develop guidelines which will serve to advise the Legislature. As that effort is just kicking off in the next month or two, the Self-Help County Coalition, comprised of the 19 transportation sales tax counties around the State, have been developing guidelines to advise and direct the program. TAM has had substantial input into that process. The program recommendation from the Self-Help Coalition is likely to shape legislative guidance. Current guidance:

- The Coalition will likely support the match being for "voter approved initiative funds". Legislative staff has indicated that the intent of the legislation was for voter-approved self-help counties to benefit from the funds. The transportation sales tax counties with votes in November need this program to pass their local measures, as an incentive. (NOTE" local tolls" in the Bay Area will also likely qualify)
- The minimum amount for a project to qualify has been roughly established at \$5 Million., reduced from an ideal of \$25 million supported by the larger counties around the state.
- "Use it or Lose it" provisions will be built in to the guidance. In other words, once you get the funds, you will have a year to advertise and get the project under construction, or lose the SLPP match.
- Rehabilitation projects will be eligible, likely limited to major reconstruction of facilities.

For Marin, the nearly \$100 million in local sales tax invested in Local Infrastructure will substantially qualify for SLPP funds. Note that under the previous SLTPP program, match varied from a low of 5.6% to a high of 30%. The Legislature will be addressing SLPP guidance and criteria in the spring of 2007.

## <u>Local Streets & Road Improvement Congestion Relief and Draft Safety Account –</u> \$2 Billion

These funds are described in statute as a formulaic distribution, 50% to counties and 50% to cities. MTC has developed an estimate of funds to be distributed in the Bay Area. Funds coming to Marin total \$14,464,612. See Attachment A for exact amounts to each jurisdiction.

#### <u>Public Transportation Modernization Improvement and Service Enhancement Account \$7</u> Billion

After \$100 million is taken off the top of this account for intercity rail improvements, the remainder is distributed 50% per existing statutory formulas for State Transit Assistance (STA) Revenue-Based Share and 50% for existing statutory formulas for STA Population-Based Share. The revenue-based share goes to the Bay Area transit operators. The distribution, at this point in time, is envisioned to go to existing transit operators. Golden Gate Transit will receive \$40 million of which a share will come to the Marin county Transit District per the existing 5-year contract between Golden Gate and MCTD. See Attachment B for Bay Area totals. The Population – Based funds come to MTC and are distributed via MTC policy. MTC may or may not revise their 1991 policy guiding the use of these funds. Discussions regarding this will ensue after the bond measures are passed in November.

#### State Transportation Improvement Program (STIP) Augmentation - \$2 Billion

Marin County is due to receive \$10.3 million as their Regional Transportation Improvement Program (RTIP) county share from the STIP element of the I-Bond. Per SB-45 rules, Marin will be able to program these funds to eligible projects in Marin County. The CTC intends to engage in a 2006 STIP Augmentation process beginning in early spring 2007 with adoption of the programming of these funds by July 2007.

TAM will look closely at its needs after the adoption of the CMIA list of projects March 1, 2007 by the CTC. It is likely that improvements at the Hwy 101/131 Interchange, the Tiburon Wye, will fare better as a local RTIP commitment than in the CMIA program. As substantial work will be completed in detailed scoping of the improvements at the Greenbrae/580/101 complex, it may also be a candidate for future RTIP. Note also that TAM will be working very closely with Caltrans to compete for Interregional Transportation Improvement Program (ITIP) funds from the STIP as well, which are under Caltrans and CTC discretion. Note that Hwy 101 and Hwy 580 are strong candidates for these funds.

#### Transportation Investment Fund, Proposition 1A

Upon approval of SCA7, Torlakson, the Transportation Investment Fund, by the the Legislature and Governor, a permanent fix is feasible upon voter approval of the diversion of Proposition 42 revenues to other than transportation purposes, recasting the suspension provisions. With diversion to be allowed twice in a ten-year period and requiring interest repayment, Proposition 42 revenues will be more reliably available in addressing transit, highway, and local street and road needs.

Marin will receive its share of the Proposition 42 revenues from the Prop 42 40% Local Streets and Roads element. The 40% share assigned to the STIP is assumed in the CTC Fund estimate for the 2006 STIP, therefore an increased amount of STIP funds beyond what is already known

to be available to Marin County is unlikely. The 20% share of PTA funds from Prop 42 feed into the STIP and the STA pot. There will likely be additional discussion in future years over more of the PTA going to STA versus the STIP as the STIP has an excess of PTA funds available. A detailed summary of local streets and roads amounts is shown in Attachment C.

In summary, staff recommends that the TAM Board adopt a support position for Proposition 1A and Proposition 1B on the ballot in November 2006.

Attachments: A – Bay Area Share of Proposition 1B Local Street and Road Funds

B – SB 1266 Infrastructure Bond Summary: Public Transportation Modernization and Improvement

C – Bay Area Share of Proposition 42 Street & Road Funding, FY 2009 Estimate

## Bay Area Share of Proposition 1B Local Street and Road Funds
